ABOUT ME

I'm a passionate software developer with a strong foundation in computer science. My problem-solving skills and commitment to clean, efficient code drive my work. I excel in collaborative environments and have experience in mention a relevant skill or technology. Eager to contribute my skills and adaptability to innovative projects. Excited to join a forward-thinking team.

WORK EXPERIENCE

2022 - 2023
ABBS | Bangalore , Karnataka

Cyber Cafe Management

The project entitled "Cyber Café Management System" is a software package, which can be used in cyber cafés for managing the clients' computer efficiently.
Now a day's cyber terrorism, which is mainly undergone through internet cafes, need to be tackled properly. Thereby, it is indeed necessary to store the valid information of the user who comes for internet access. The system being used, the time at which the user logs in and logs out should be recorded systematically

PROJECTS

SS Home Applience
machines after long run tend to break down. At times they break down early due to misuse or over use. The electrical appliances like mixer/ grinder, Geysers, water heater, fan, Iron, etc. are widely used in almost every house hold. The maior manufacturers are Usha, Bajaj, Compton, Onida, Videocon, LG etc. These electrical appliances do need periodic servicing, maintenance and repair actively. Though there are a number of authorized repair & servicing centers, provided by the authorized dealers network but still there is wide spread need of the repair & servicing centers to cater the need of repair and servicing activity for these appliances specially in semi urban and rural areas.
